

International Conference on Tsunami Warning

First Announcement and Call for Papers

Organized by :

Towards Safer Coastal Communities

November 12-14, 2008
Bali, Indonesia

About The Conference

The Trans Indian Ocean Sumatran Tsunami and following natural disasters in Indonesia expressed the global vulnerability and urgent need for early warning. The disasters changed practises on how to proceed forward with hazard risk reduction, preparedness and development.

With support from other countries, Indonesia is launching the Indonesian Tsunami Early Warning System (Ina-TEWS) in order to protect both communities and development in the coastal regions.

Theme and Topics

- The International Conference for Tsunami Warning (ICTW) will focus on (but not limited to):
- Seismic Monitoring
 - Sea-Level Monitoring
 - Database, Modelling and Simulation
 - Information, Communication and Warning Dissemination
 - Community Preparedness and Mitigation.

Other Related Events

The ICTW offers to participate at the official launch of the Ina-TEWS by the President of Indonesia and to join the Asian Conference on Disaster Reduction (ACDR) 2008 and an exhibition at the same time and place.

Further Related Information

This is first announcement and call for paper. The second announcement and call for paper will be issued early January 2008. Please check <http://www.pirba.ristek.go.id> for intermediate update.
