World Forum

The Hague, The Netherlands, 31 October – 5 November 2010

Organisation of Work

General introduction

The Seventeenth session of the Commission on Sustainable Development (CSD-17) of May 2009 and the FAO World Summit on Food Security of November 2009 voiced a clear message: the multiple challenges the world is facing in terms of food insecurity, deforestation, climate change, degradation of ecosystems and economic recession require an integrated response and an urgent transition of the world economy towards a sustainable, inclusive and resource efficient path. A paradigm shift at all levels is needed: Agriculture should be considered as an important part of the solution. Agriculture and food security should be at the heart of sustainable development and poverty eradication efforts, as well as those related to climate smart growth.

In this light the Government of The Netherlands, in close co-operation with the governments of Ethiopia, Vietnam, Mexico, New Zealand, Norway, and with the World Bank and the Food and Agriculture Organisation (FAO), organizes the Conference on Agriculture, Food Security and Climate Change.

This international conference will be held from 31 October – 5 November 2010 in World Forum in The Hague, The Netherlands.

Organisation of Work

The proposed organization of work of the conference can be divided in three main parts:

1. The **Opening Session** on 31st of October, featuring, among others **Key note addresses by a number of eminent persons**. The addresses will focus on substantial elements for setting the scene of the topics and linkages between agriculture, food security and climate change.
2. **Parallel working group sessions** from 1 November-5 November. These provide an opportunity to focus deliberations on identifying barriers and constraints, lessons learned and best practices in relation to the thematic issues of the session, resulting in a concrete Roadmap for Action.

Participants are invited to enter into interactive discussions and are encouraged not to use written statements. The parallel working groups will be chaired by two Co-Chairs. The Co-Chairs will report on the outcome of the discussion in the plenary session the day thereafter. Reports of the Co-chairs, together with the three background papers by FAO, World Bank and CGIAR, and the country cases that were subject of discussion in the working groups will form the basis of a draft Roadmap for Action, that will be presented during the plenary on Thursday

November 4th. This Roadmap will be developed in the course of the conference and will be discussed during the ministerial roundtables and working groups. It will have the form of a Chairs Summary (not a negotiated document).

3. The **Ministerial roundtables** from 4-5 November in which **the draft Roadmap** will be discussed.

The Ministerial Round Tables are intended to allow for a frank and open exchange of views among Ministers. Ministers are invited to enter into interactive discussions and are encouraged not to use written statements. Attendance will be on the basis of Minister plus one.

Furthermore **an Investment Fair** will be held throughout the Conference in order to match climate smart agriculture projects and ideas with potential investors.

Moreover numerous **side events** will take place. These are sponsored by Governments, UN organizations, NGOs and Major Groups, and will be a complementary part of the programme to generate informal opportunities for exchange of experience and lessons learned.

The outputs of the conference will include:

- A **Roadmap for action** (Chair's summary) based on discussions during the Opening session and the Working Groups sessions, and the High-level Segment;
- **Results of the Investment Fair.**
