

Overview

The World Water Week in Stockholm involves more than 170 collaborating organisations and over 90 different plenary sessions, workshops, seminars, side events, panels, social events, field visits and prize award seminars. On these two pages, you can see what activity takes place on each day and the page it can be found on.

Workshops (in blue) are initiated by SIWI, the World Water Week host, and have programmes developed through an open abstract submittal process. Seminars (in yellow) and side events (orange) are initiated by different convenors and co-convenors, who develop their own programme content and format.
