

UNITED KINGDOM
NATIONAL SUMMARY REPORT

Contact:	Janet Douglas (IDNDR Focal Point) Emergency Aid Department Overseas Development Administration 94 Victoria Street London SW1E 5JL	Phone: 071-917-0792 Fax: 071-917-0502 Telex: -
and		
	Linda Cook IDNDR UK Committee Secretary c/o Royal Academy of Engineering 2 Little Smith Street London SW1P 3DL	Phone: 071-222-2688 Fax: 071-233-0054

SECTION A: PROFILE

(This section contains relevant basic information about your country.
Please complete and check the information already included).

1. Composition of National Committee (Focal Point):

(Please list the names of the institutions represented and indicate in the brackets the number of members for each group)

<p>Ministries</p> <p>- Overseas Development Administration (ODA) [1]</p> <p>Academic & Research Institutions</p> <p>- Royal Society [*] - Royal Academy of Engineering - British Geological Survey - Cambridge University - Institute of Hydrology</p> <p>Private Sector</p> <p>[]</p> <p>Public Services (e.g. meteorological.etc)</p> <p>- []</p>	<p>Non-Governmental Organisations</p> <p>- Oxford Centre for Disaster Studies [1]</p> <p>Media</p> <p>- []</p> <p>Insurance</p> <p>[]</p> <p>Others</p> <p>Private advisers and consultants [*]</p>
---	---

* Variable - members attend according to availability - usually 10-15 members attend meetings

2. **Internal organisation of the National Committee**

(Please describe hierarchy, responsibilities, coordination and cooperation mechanisms in natural disaster reduction activities.)

The UK IDNDR Committee operates independently of central government and is organised under the joint auspices of the Royal Academy and the Royal Academy of Engineering. The Chairman is Professor Sir John Knill of the Royal Academy of Engineering. The Committee includes members from a variety of academic and technical backgrounds (eg. Seismology, Medicine, Meteorology, Engineering), Disaster Management Experts and an "Ex-Officio" representative of ODA. There are a number of Working Groups : Medical and Social Sciences ; Drought Mitigation; Earthquake Risk Reduction; Science, Technical and Engineering; the Hazards Forum. In addition, the Committee is in the process of establishing a further Working Group on Applications and Implementation.

3. **Prevailing hazards**

TYPE	LOCATION	AFFECTED POPULATION
No specific major hazards such as earthquake, volcano etc. but UK does suffer meteorological hazards - eg high winds, floods	Floods, Winds etc are not location orientated	Variable according to location damage

(Please attach additional information if necessary)

4. **Recent natural disasters**

TYPE	LOCATION	AFFECTED POPULATION	LOSSES
Floods	Devon, Cornwall and Essex June 1993	Rural Populations Provincial Town Dwellers	N/A
Floods	Southern England - December 1993-January 1994	Rural and Provincial Town Dwellers	N/A

5. **National socio-economic conditions**

- * Population: 57.701 million
- * Gross-National Product (GNP): US\$ 1024,769 million
- * Per-Capita Income: US \$17,760 per capita

6. Availability of assistance to other countries in the field of natural disaster reduction

(Please list potential resources, scientific expertise, technology, etc.)

- Scientific expertise and advice in whole range of natural hazards and their mitigation, complementary advice on monitoring, early warning and preparedness.
- Advice from academic, NGO and official (ODA) sources on social development/community based aspects of vulnerability assessment, mitigation and preparedness.
- Funding: £2 million per annum from Overseas Development Administration Emergency Aid Department budget to be spent on disaster mitigation and preparedness projects (including training, rapid response capability) plus other ODA funding within development programme.

7. International assistance required for natural disaster reduction

(Please indicate requirements for scientific expertise, technology, resources etc).

NONE REQUIRED BY UK.

SECTION B: STRATEGIES AND ACTIVITIES

(This section deals with current or planned strategies and activities)

1. Steps towards achieving the 3 main Decade targets

- (a) Comprehensive national assessments of risks from natural hazards, with these assessments taken into account in development plans:

The UK has no need for such assessments. But the UK IDNDR Committee and the Overseas Development Administration strongly support the concept of integration of national hazard assessments into national development plans of disaster-prone countries. The UK Overseas Development Administration is also firmly committed to the concept of disaster preparedness as an integral component of the relief/development continuum. It has therefore linked disaster preparedness and mitigation to its national disaster relief initiative, with an annual budget of £2 million.

- (b) Mitigation plans at national and/or local levels, involving long-term prevention and preparedness and community awareness; and

As above, the UK is supportive of the development of mitigation planning in disaster-prone countries. The ODA's support has been extended to planning at national and local level. Examples of the projects funded by ODA in disaster-prone countries can be found in section B(4) of this questionnaire.

- (c) Ready access to global, regional, national and local warning systems and broad dissemination of warnings.

The UK already benefits from ready access to such warning systems. Two of the projects supported by ODA's disaster preparedness budget for disaster-prone countries, the demonstration IDNDR 'Megacities' project and a number of ODA-funded technical projects, are designed to enhance monitoring and early warning systems in developing countries.

2. Present national plan for natural disaster reduction

- a) Time span covered:

Ongoing.

- b) Agencies, institutions and organisations involved:

Under the Civil Defence Act 1948, Local Authorities are required to produce emergency plans for wartime scenarios. The 1993 regulations extend the terms of the act by encouraging an integrated approach to emergency management, thus allowing local authorities to plan for peacetime emergencies, including natural disasters. The arrangements for dealing with disasters in the United Kingdom are based on local authorities and the local emergency services: police, fire, ambulance. There is no separate organisation such as a national disaster relief agency. Central government has a number of roles: it contributes towards the cost of the emergency services; it provides specific funding to local authorities for emergency planning; it sets the legislative framework such as making regulations for major chemical hazards; it provides training facilities such as the Emergency Planning College in Yorkshire and issues guidance on emergency matters. In the event of an emergency, central government also provides advice and support in the form of specialists who may not normally be available to local authorities. Another principal task falling to central government is that of gathering information so that authoritative reports may be given to Parliament, the public and the media. On occasion, central government may be the main source of information about an emergency, for example in the case of an overseas nuclear accident which may affect the UK.

Within central government, each government department has responsibility for ensuring that there are adequate arrangements for dealing with emergencies in their own areas of interest. For example, the Department of Transport acts as lead government department in the event of rail or air accidents. The Home Office is the department responsible for the police and fire services. It also takes the lead on general emergency planning issues and provides funds for local authority emergency planning. Coordination of the activities of central government departments is undertaken by a nominated lead department. Departments are nominated in advance for a number of specific scenarios by the Cabinet Office Civil Contingencies Unit. The use of criteria such as the nature of the incident and availability of facilities, like an emergency operations room, determines which department is the lead department.

Most day to day emergency planning is undertaken by local authorities and the emergency services. This is in keeping with Home Office policy that the responsibility for developing and executing emergency plans should rest with those who provide services in normal circumstances. Historically, the Home Office provided funding for local authorities for civil defence planning but in October 1990, the Home Secretary initiated a review of civil defence and emergency planning. The main outcome of the review was to give greater prominence to peacetime emergency planning by the adoption of integrated emergency management. This is a more broadly based planning process which will ensure that there are structures in place which can deal with any emergency, whatever the cause. The Home Office also has lead responsibility in severe weather circumstances involving high winds and for nuclear powered satellite accidents. In the event of a disaster at a sports ground it would coordinate with the Department of National Heritage (which has responsibility for sport).

In any circumstances where the Home Office has lead department responsibility, the central government response would be coordinated by the Emergency Planning Division. The Division has a well equipped Emergency Operations Suite which would be activated and fully staffed on a 24 hour basis. In order to carry out its lead department role the Home Office will have established links with the emergency services and local authorities dealing with the incident. Where advance warning of the event has been possible, then links will have been set up in advance, and information gathered at the national level disseminated locally. The Home Office Public Relations Branch would provide regular briefing for the media.

In the event of a disaster, the emergency services are usually first on the scene and act in accordance with their major incident plans. The police coordinate the activities of the emergency services; the fire service is responsible for firefighting and rescue and the ambulance service provides emergency treatment at the scene and removes casualties to hospital for further treatment. The local authority normally carries out a supporting role in the initial stages but may assume the coordinating role when the initial response phase is over. The United Kingdom also has a number of voluntary organisations which provides valuable assistance in the response to a disaster. The emergency services generally incorporate the use of these volunteers into their emergency plans to cover areas such as caring for survivors, evacuees and emergency workers and other support tasks.

The Home Secretary also appointed a Civil Emergencies Adviser to act as an independent adviser on civil emergencies matters. He has produced a guidance document entitled "Dealing with Disaster", which aims to assist those involved in planning for and responding to disasters. It emphasises the importance of coordination and integration of the activities of all those involved in the disaster response in order to maximise effectiveness.

c) **Implementing agencies:**

The Meteorological Office issues weather flash warnings to relevant bodies. In cases of high winds, for which the Home Office has responsibility, the Emergency Planning Division opens its emergency operations suite. This has communications systems such as COPOST, which would enable warnings to be disseminated to local authorities. The emergency services of the affected local authority provide the response on the ground.

d. **Funds available for implementation:**

Funded from central government funds for Home Office administrative activities and planning. Local authority funds pay for local authority activities. The Home Office provides funds for local authority emergency planning.

3. **Legislation introduced and enacted in relation to natural disaster reduction**

See 2(b) above for UK arrangements

4. Disaster mitigation activities completed or underway:

By type (ODA Funded)

a) Identification of hazard zones: hazard assessment

- 1 Volcanic hazards project: Chile
- 2 Hazard mitigation consultancy for Hualcan lake: Peru
- 3 Flood mitigation project: Vietnam
- 4 Investigation of the lake Nyos gas disaster: Cameroon

b) Monitoring, predicting and warning

- 1 Workshop on the Galeras volcano: Colombia
- 2 Funding for WMO tropical cyclone committee

c) Short term protective measures and preparedness

- 1 Cranfield Disaster Preparedness Centre: Logistics training course
- 2 Disaster preparedness training for Egypt
- 3 BRC project to expand the capacity of the Nepal Red Cross to deliver relief supplies.
- 4 Consultancy visit to the Centre for Disaster Management and Rural Reconstruction, India
- 5 Counter disaster training course: CEDERA
- 6 Funding for the UNDHA Search and Rescue Directory
- 7 Funding for UNDAC standby team
- 8 Funding for INSARAG Exercise '93
- 9 Funding for DHA Emergency Stockpile Register
- 10 Funding for UNDP/UNDHA disaster management training
- 11 PAHO project to develop capacity for disaster mitigation and mass casualty management in the Caribbean
- 12 Feasibility study for the development of disaster management training: Tanzania

d) Long term preventive measures

- 1 ITDG regional disaster mitigation project for Latin American countries
- 2 UNDHA regional disaster mitigation project for the South Pacific

e) Land-use and risk management

- 1 Trials of new anti-locust pesticides: Madagascar

f) Public education and information

- 1 Introductory seminar for delegates to UK IDNDR Conference: Protecting Vulnerable Communities
- 2 Funding for Beijing WMO conference
- 3 Funding for participants at a Hurricane Conference, Florida
- 4 Support for information specialist at IDNDR Secretariat, Geneva

DISASTER MITIGATION ACTIVITIES COMPLETED OR UNDERWAY:

a) *Identification of hazard zones: hazard assessment*

Title of project:

1) Volcanic hazards project: Chile

Status:

3 year project commencing 1994.

Participating institutions in the country and/or on the international level:

The Chilean Geological Survey (SERNAGEOMIN)

Costs of project:

£345,000

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

Southern Andes Volcano Observatory. (SAVO).

Address (telephone and fax-number) of the agency in charge:

Professor R S J Sparks
Department of Geology
University of Bristol
Will Memorial Building
Queens Road
Bristol, BS8 1RJ

Tel: 0272 303030

Fax: 0272 253385

DISASTER MITIGATION ACTIVITIES COMPLETED OR UNDERWAY:

a) *Identification of hazard zones: hazard assessment*

Title of project:

2) Hazard Mitigation consultancy for Hualcan Lake, Peru

Status:

Underway

Participating institutions in the country and/or on the international level:

Electro Peru

Costs of project:

£18,000

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

Applied Geology

Address (telephone and fax-number) of the agency in charge:

Dr John Reynolds
Applied Geology Limited
Techbase 3, Newtech Square
Deeside Industrial Park
Deeside
Clwyd, CH5 2NT

Tel: 0244 280324

Fax: 0244 288740

DISASTER MITIGATION ACTIVITIES COMPLETED OR UNDERWAY:

a) *Identification of hazard zones: hazard assessment*

Title of project:

3) Flood Mitigation project in Vietnam

Status:

Completed 1992

Participating institutions in the country and/or on the international level:

Government of Vietnam

Costs of project:

£31,990

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

UNDHA

Address (telephone and fax-number) of the agency in charge:

John Tomblin
Chief Disaster Mitigation Branch
UNDHA
Palais des Nations
CH-1211
Geneve 10
Switzerland

Tel: 010 4122 7310211

Fax: 010 4122 7335623

DISASTER MITIGATION ACTIVITIES COMPLETED OR UNDERWAY:

a) *Identification of hazard zones: hazard assessment*

Title of project:

4) Investigation of the Lake Nyos gas disaster, Cameroon

Status:

Completed

Participating institutions in the country and/or on the international level:

Ministry of Mines and Power: Republic of Cameroon

Costs of project:

£4,702

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

Geological Hazards Research Unit
University College of Swansea

Address (telephone and fax-number) of the agency in charge:

Dr S J Freeth
University College of Swansea
Natural Sciences Buildings
Singleton Park
Swansea, SA2 8PP

Tel: 0792 295522

Fax: 0792 205556

b) *Monitoring, prediction and warning*

Title of project:

1) Workshop on Galeras Volcano, Pasto, Colombia

Status:

Completed 1993

Participating institutions in the country and/or on the international level:

US Geological Survey
UNDRO and others

Costs of project:

ODA input £1,165

Sources of funding:

UN and other donors

Implementing agencies:

Attendee at workshop: Dr Peter Baxter
University of Cambridge

Address (telephone and fax-number) of the agency in charge:

IDNDR Geneva Secretariat

b) *Monitoring, prediction and warning*

Title of project:

- 2) World Meteorological Organisation
RA V Tropical Cyclone Committee fourth session, Geneva

Status:

Completed

Participating institutions in the country and/or on the international level:

- () Funding of participants from Kiribati, Niue and Tokelau

Costs of project:

£4,166

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

World Meteorological Organisation

Address (telephone and fax-number) of the agency in charge:

Dr Obasi
Secretary General
World Meteorological Organisation
41 Avenue Giuseppe Molta
Case Postale No. 2300
CH-1211 Geneva 2
Switzerland

Tel No: 010 4122 730 8111

Fax No: 010 4122 734 2326

c) *Short-term Protective measures and preparedness*

Title of project:

- 1) Logistics training at Cranfield Disaster Preparedness Centre

Status:

Completed 1993

Participating institutions in the country and/or on the international level:

- 1) Participants from Anguilla and Lesotho

Costs of project:

£27,687

Sources of funding:

ODA Disaster Preparedness funds

1) Implementing agencies:

Cranfield Disaster Preparedness Centre

Address (telephone and fax-number) of the agency in charge:

RMCB
Shrivenham
Swindon
Wilts, SN6 8LA

Tel: 0793 785287

Fax: 0793 782179

c) *Short-term Protective measures and preparedness*

Title of project:

2) Disaster preparedness training for Senior Egyptian officials

Status:

Completed

Participating institutions in the country and/or on the international level:

Government of Egypt

Costs of project:

£11,204

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

UNDRO, Geneva

Address (telephone and fax-number) of the agency in charge:

Eric Alley OBE
Consultant, United Nations Disaster Relief Organisation
'Farthings'
Gembling
Driffield
North Humberside
YO25 8HS

Tel No: 0262 488 518

c) *Short-term Protective measures and preparedness*

Title of project:

- 3) Disaster Preparedness Project: Nepal
To expand the capacity of the NRC to respond to disasters

Status:

Underway

Participating institutions in the country and/or on the international level:

British Red Cross
Nepal Red Cross

Costs of project:

£185,679

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

NRC

Address (telephone and fax-number) of the agency in charge:

Geoffrey Dennis
International Director
British Red Cross
9 Grosvenor Crescent
London, SW1X 7EJ

Tel: 071 235 5454

Fax: 071 235 0397

c) *Short-term Protective measures and preparedness*

Title of project:

- 4) Consultancy visit to the Centre for Disaster Management and Rural Reconstruction: India

Status:

Completed

Participating institutions in the country and/or on the international level:

Centre for Disaster Management and Rural Reconstruction at the National Institute of Rural Development, Hyderabad, India

Costs of project:

£7,519

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

Cranfield Disaster Preparedness Centre

Address (telephone and fax-number) of the agency in charge:

Dr Ritchie
Cranfield Disaster Preparedness Centre
Shrivenham
Swindon
Wilts, SN6 8LA

Tel: 0793 785287

Fax: 0793 782179

c) *Short-term Protective measures and preparedness*

Title of project:

- 5) Caribbean Disaster Emergency Response Agency (CDERA)
Counter-Disaster Training Workshop

Status:

Completed

Participating institutions in the country and/or on the international level:

CDERA _____

Costs of project:

£65,454

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

CDERA

Address (telephone and fax-number) of the agency in charge:

Jeremy Collymore
Regional Coordinator
CDERA
The Garrison
St. Michael
Barbados, W. Indies

Tel: 010 809 436 9651

Fax: 010 809 437 7649

c) *Short-term Protective measures and preparedness*

Title of project:

6) UNDHA Search and Rescue Directory

Status:

Underway

Participating institutions in the country and/or on the international level:

UNDHA INSARAG (International Search and Rescue Advisory Group)

Costs of project:

£26,572 (UK Contribution)

Sources of funding:

ODA Disaster Preparedness funds

Implementing agencies:

UNDHA

Address (telephone and fax-number) of the agency in charge:

Robert Souria
