

United Nations International Strategy for Disaster Reduction

National Platforms for Disaster Risk Reduction

www.unisdr.org

Workshop on National Platforms – IDRC 2008 – Davos – 24 August 2008

Lars Bernd, Programme Officer National Platforms, UN/ISDR secretariat Geneva, bernd@un.org

Outline

1) National Platform definition, rationale, linkages to the Hyogo Framework for Action (HFA) and the ISDR system

2) Where do we stand?: Disaster and disaster risk trends

3) Where do we stand on NPs?: National Platforms worldwide

4) UN/ISDR secretariat support to National Platforms, incl. Toolkit

5) PreventionWeb - the web portal for DRR and potential NP use

National Platforms – A definition

•A nationally owned and led forum or committee of multistakeholders

•Serves as an advocate for DRR at different levels

•Provides **coordination**, **analysis and advice** on areas of priority requiring concerted action through a coordinated and participatory process.

•A **commitment** to work on prevention, preparedness and mitigation instead of merely focusing on disaster management and recovery

As such it is mentioned in the **Hyogo Framework for Action's** Priority of Action 1 – adopted by 168 States

Previously referred to in UN Economic and Social Council Resolution 1999/63 and 2005 UN General Assembly resolution A/RES/59/231

National Platforms – A definition (cont'd)

•Should be **the coordination mechanism for mainstreaming DRR** into development policies, planning and programmes in line with the implementation of the **Hyogo Framework for Action**

•Should aim to **contribute to** the establishment and the development of a **comprehensive national DRR system**, **as appropriate** to each country and be its **custodian**.

•They are **not necessarily new institutions**, but should rather be **built on existing ones** to become a forum for exchange and decision-making for coordinated DRR as a **multi-sectoral, multi-stakeholder tool**

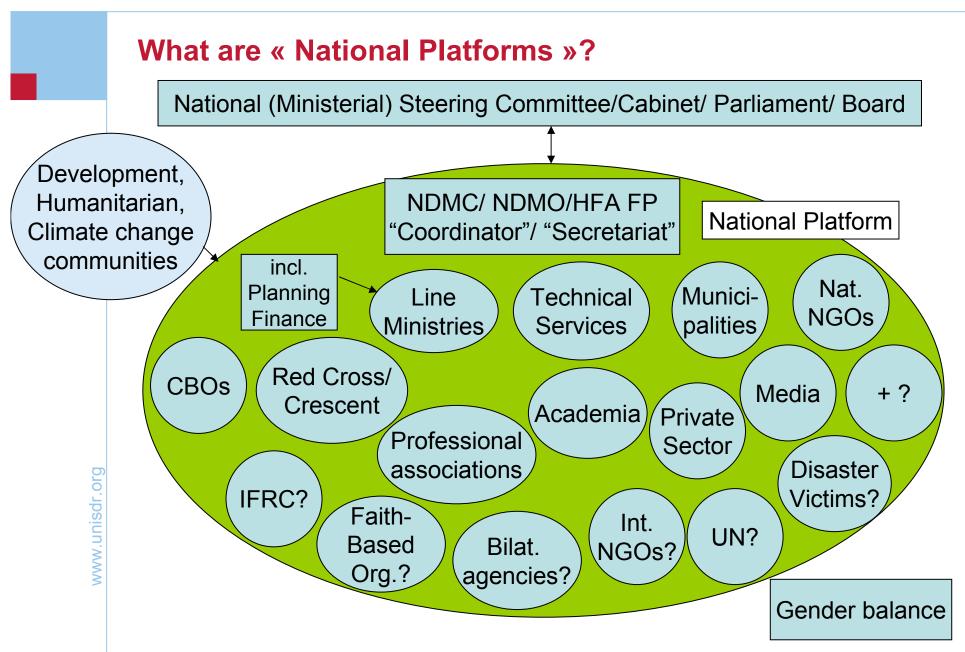

National Platforms – A definition (cont'd)

National Platforms are NOT:

- The HFA Focal Point institution
- The National Disaster Management Institution
- A National Steering Committee composed of Government Ministries
- The Civil Protection Service

...but it may well be an existing national partnership forum of different stakeholders on DRR, that keeps its name and just becomes officially declared as National Platform for DRR.

National Platform core functions

- Be a **catalyst** for national consultations and consensus building
- Increase national leadership and commitment to the sustainability of disaster risk reduction and implementation of Hyogo Framework
- Enhance collaboration and coordination amongst national stakeholders
- Manage the progress towards achievement of DRR objectives rather than producing a « plan », monitor & evaluate and report

•Increase levels of knowledge and skills on risk reduction

• **Increase national commitment to help** the most vulnerable and at risk population

• Serves as national focal point within the ISDR system and strengthens links with the ISDR secretariat

Rationale: Why « National Platforms »?

"All spheres of government, all sectors of society and every professional discipline has a responsibility to consider how it can contribute to reducing risk within its own sphere of responsibility...

Every citizen can contribute to disaster risk reduction by thinking safety and acting safely."

From the introduction to the South African Disaster Management Act (2002) as presented by the City of Cape Town <u>Disaster Risk Management</u> Centre... for use by councilors and officials with <u>Disaster Risk Management</u> responsibilities

www.unisdr.org

Rationale: Why «National Platforms»? (cont'd)

Disaster Risks – Some areas of relevance leading to stakeholders

Professional, academic, applied interests

- Public health, Epidemiology
- Food and Livelihoods, production
- Geography (human habitats)
- Natural resources, Environmental management
- Climate change
- Physical sciences (natural hazards)
- Social sciences, Sociology, Anthropology
- Risk (and vulnerability) assessment
- Engineering, Infrastructure, Physical facilities
- Planning ("land use") professions
- Public administration
- Education
- Economics

Rationale: Why «National Platforms»?

- A tool for more efficient and effective action to reduce risks

Efficiency and effectiveness – coordination, all under one umbrella, "entry point", minimise parallel structures and duplication

Resource Mobilisation – coordinated way of accessing existing resources available for Risk Reduction, avoid competition

Sustainability of DRR interventions – put action on a more long-term footing, legal basis, structures, entry point, ensure continued funding

coordinated international and regional

ISDR programme

efforts to support national and

local capacities

ISDR system levels of action ("platforms") Define priorities: Strategic information, guidance and assessments of progress

National implementation

National frameworks, multi-stakeholders, and multi disciplinary National Platforms for DRR Support from UN country team and/or WB – when appropriate

Regional

Based on existing regional and sub-regional strategies and mechanisms e.g. Africa: African Union with RECs – African Strategy for DRR

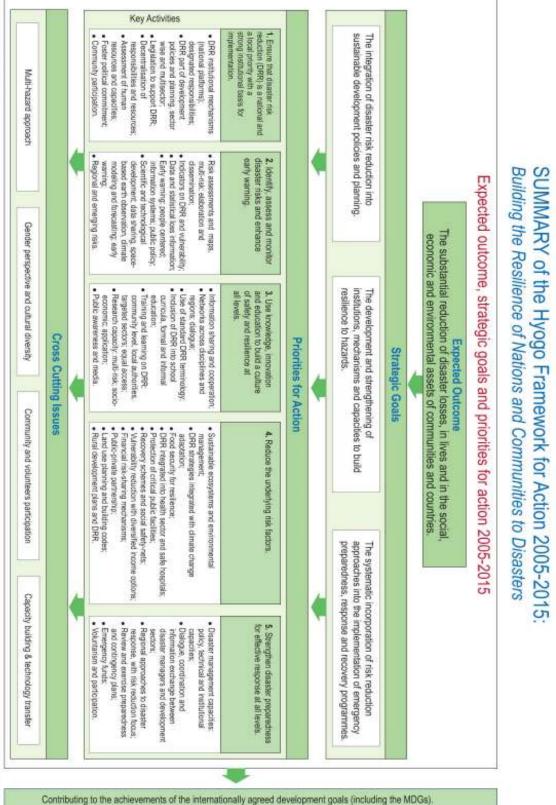

Thematic

Building on existing networks, clusters, programmes and other mechanisms Africa: Drought network; Floods (Climate change); Environment (AMCEN)

Global Platform for DRR

Biennual sessions Global Assessment Report

Source: Outcome of the World Conference on Disaster Reduction, Kobe, Hyogo, Japan, 18-22 January 2005 Critical tasks Mobile resources and capabilities of relevant national, regional and international bodies, including the UN system; Provide and support the implementation of the HFA in disaster prone developing countries, including through financial and address and support the implementation of the HFA in disaster prone developing countries, including through financial and address and support assistance, addressing debt sustainability, technology transfer, public-private partnership and North-South and Mainstream DRR measures into multilateral and bilateral development assistance programmes South-South ocoperation: Implementation by different stakeholders, multi-sectoral approach; participation of divil society (NGOs, CBOs, volunteers), scientific community & private sector is vital. In order to achieve the strategic goals and act upon the priorities for action, the Framework identifies the following tasks for implementation and follow-up by States, regional and international organizations in collaboration with civil society and other stakeholders. The ISDR partners, in particular the Internagency Task Force on Disaster Reduction (WTFIDR)⁺ and secretariat, are requested to assist in implementing the Hyogo Framework for Action. Consider acceding to: approving or ratifying relevant International legal instruments and make sure they are implemented; Promote the integration of DRR with climate variability and climate change into DRR strategies and adaptation to climate change; Develop procedure for reviewing national progress including systems for cost benefit analysis and orgoing monitoring on risk; Publish and update a summary of national programme for DRR National baseline assessments of the status of DRR; In broad consultation, develop generic, realistic and measurable indicators. These indicators could assist States in Develop a matrix of roles and initialities in support of follow-up to the Hyogo Framework; Facilitate the coordination of effective actions within the UN system and other international and regional entities to Designate national coordination mechanisms for the implementation including international cooperation; ensure management of risks to geological hazards and follow up, communicate to the ISDR secretariat measuring progress in the implementation of the Hyogo Framework. support the implementation of the Hyogo Framework, identify gaps, facilitate processes to develop guidelines and policy tools for each priority area. States States primarily responsible; an enabling international environment is vital, ind, strengthened regional Cabacines Resource Mobilization: States, Regional and International Organizations Promote regional programmes including for technical Establish specialized regional collaborative centers. Support the development of regional mechanisms and Undertake and publish regional and sub-regional Coordinate and publish reviews on progress and Regional Organizations and institutions capacities for early warning, including for Isunami national summanes support needs, and assists countries in preparation of baseline assess information and effective mubilization of resources; methodologies and standards for hazard and vulnerability monitoring and assessment, the sharing of cooperation, capacity development, the development of ISDR (Inter-Agency Task Force on Disaster Reduction and secretanal) Implementation and Follow-Up partnerships stakeholder Build multi-**General Considerations** -Africa Particular attention to: Small island developing States: Mauritus Strategy; Least developed countries Actors * The IATF/DR was replaced in 2007 by the Global Platform for Disaster Risk Reduction Provide adequate voluntary financial contribution to the UN Trust Fund for DR to support follow-up additities to Hyogo Funnement, review usage and feasibility for the expansion of this fund; Stimulate the exchange, compilation, analysis and dissemination of best practices, lessons learnt; Prepare periodic review on progress towards achieving the objectives of the Hyogo Francework and provide reports to Support national platforms and regional coordination; Register relevant partnerships with Commission on Sustainable Development; Develop partnership to implement schemes that spread risks, reduce insurance premiums, expand insurance coverage and environment that encourages a culture of insurance in developing countries increase financing for post-disaster reconstruction, including through public and private partnerships. Promote an the UNGA and other UN bodies In collaboration with networks and platform support data collection and forecasting on natural hazards and risks, early warning systems, full and open exchange of data. Support States with occordinated international relief assistance, to reduce valuerability and increase capacities; Identify actions to assid disable-prime developing countries in the implementation of the Hyogo Framework, ensure integration and that adequate funding is allocated: assist in setting up national strategies and comparison for DRR integrate actions into relevant coordination mechanisms (NOG) ASC, REC, and UN Country Tearrely. Integrate actions into relevant coordination mechanisms (NOG) ASC, REC, and UN Country Tearrely. Integrate actions that development assistance frameworks such as CCAUNDAF, PRSP. Stengthen international mechanisms to support disaster stricture States in post-disaster recovery with DRR approach Adapt & strengthen inter-ogency disaster management training for DRR and capacity building Strengthen the capacity of the UN system to assist disaster-prote developing countries in DRR and implement measures for Encourage the integration of DRR into humanitarian and sustainable development fields assessment of progress International Organizations (including UN System and IFIs) organizations to foster coordination among themselves and a strengthened International Strategy for Disaster Reduction (ISDR). States, regional and international litelydoudde se sweylau other major conferences in fields relevant to DRR; Follow-up integrated with www.unisdr.org

www.unisdr.org

Trends: Statistics included in the latest UN Secretary-General report on the ISDR (2008)

July 2007-June 2008

•364 disasters caused by natural hazards, with some signs of increased frequency and amplitude

- •212 million people affected
- •240,000 killed (13 times higher than previous reporting period)
- •Economic cost doubled compared to 2006/2007
- •Cyclone Nargis Myanmar: 140,000 people dead or missing
- •Sichuan earthquake China: over 87,000 dead
- -> Need for effective people-centered early warning systems and EQ resistant construction

•<u>2000-2007</u>: Frequency of hydro-meteorological hazards increased by 8.4%/a on average, average annual cost exceeded US\$ 80 billion

However also encouraging examples:

Bangladesh preparedness during Cyclone Sidr: 3,400 people died compared to 300,000 during similar cyclone in 1970 and 138,000 in 1991
Other examples: Iran during cyclone Gonu, Madagascar during cyclone Ivan and five consecutive others in 2007

Trends - Statistics included in the latest UN Secretary-General report on the ISDR (2008) (2)

Environmental degradation:

Since 1980 20% of world's mangroves lost increasing vulnerability
70% of 5.2 billion hectares of dry lands used for agriculture already degraded and threatened by desertification

•Sub-Saharan Africa: agriculture production declining by almost 1% per year

•*<u>Urbanization</u>* progressing: 3.3 billion people living in urban areas, by 2030 5 billion (in particular Africa and Asia)

•*Risks of increased vulnerability* - due to high population density, insufficient livelihoods, lack of access to basic services, social vulnerability - putting people at higher disaster risk

www.unisdr.org

-> Need for urgent scaling up of the implementation of the Hyogo Framework

-> Need for further inclusion of DRR strategies and the HFA in national policies and programmes in the context of the FCC Nairobi work programme

Trends: Findings and recommendations of the latest UN Secretary-General report on the ISDR (2008)

•"In order to achieve more effective implementation of the Hyogo Framework, it is critical that Member States strengthen their cooperation through the existing Strategy system mechanisms, including national and regional platforms and the second session of the Global Platform (Geneva, 15-19 June 2009). Building on the good experiences of existing national platforms, Member States are strongly urged to develop and strengthen such national coordination mechanisms for disaster risk reduction.

•(...) 147 countries have not yet established national platforms, and 66 lack official Hyogo Framework for Action focal points.

•Despite the increased commitment by Governments and other stakeholders, governments are still not on track to achieve the goals set in the Hyogo Framework. A lack of awareness, commitment and resources still remain the main obstacles.

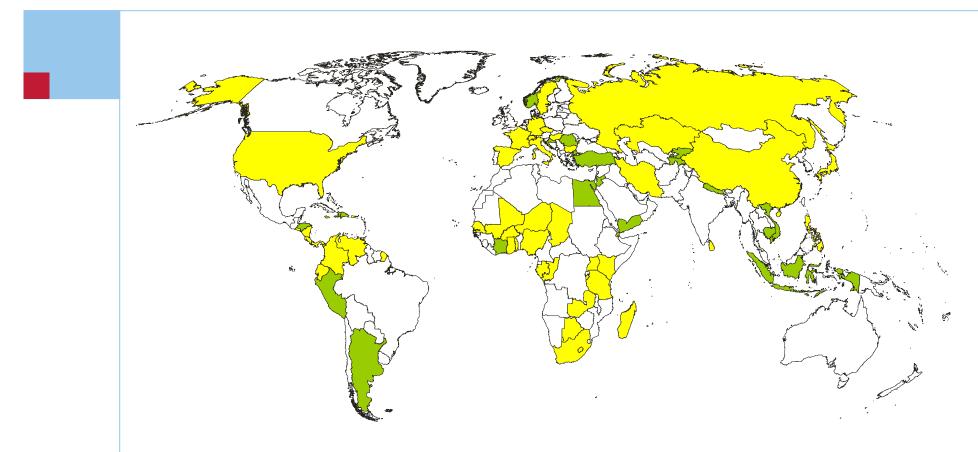

Some findings and recommendations of the latest UN Secretary-General report on the ISDR (2008)

•"... ensure strong coherence and synergy between climate change and disaster risk reduction agendas.... This could include participation in multi-stakeholder platforms for disaster risk reduction .. By all concerned entities, including for ...climate change..."

•"Member States are encouraged to...setting targets for public spending on multi-year disaster risk reduction programmes.... The Secretary-General encourages Governments, donors and funding institutions to increase their investment in DRR."

ISDR secretariat support towards National Platforms for Disaster Risk Reduction

Help establishing, motivating (workshop and multi-stakeholder dialogue, led by line-Ministry – implemented in support to/with UN RC)
Global and regional thematic meetings and training with/ among National Platforms

•Development of guidance documents, tools and contribution to ISDR partner work with NPs/ HFA FPs (incl. CCA/UNDAF guidelines, joint publications, etc.)

•Awareness raising campaigns

•Support to sharing of NP experiences (« twinning » + good practices, « ISDR-Highlights « and other magazines)

•Capacity assessments (with CADRI, UNDP....)

•Ministerial meetings in the regions

•Expertise facilitation

•HFA monitor (progress reporting and information sharing)

Assistance:

✓ Strengthening regional organisations role to support

✓ WB GFDRR Track II programmes

✓UNDP supporting programmes

UN/ISDR « Toolkit for National Platforms »

A manual to help implementing the Hyogo Framework for Action through National Platforms

•Short thematic write-ups providing tips and hints on how to implement the HFA's key activities + helpful annexes with samples, templates, checklists, guidelines, workshop outlines, web links, etc.

= Potentially useful documents and tips for addressing particular aspects of NPs' work drawn from NPs, NDMCs/ focal point institutions, publications, websites, UN and other partner resources.

•(Excerpts of) existing resources rather than writing of new ones

•It refers to main actions, which are considered critical for every National Platform to play its expected role as outlined in the related "Guidelines for National Platforms for DRR".

• Aligned with the Hyogo Framework for Action.

This cannot see the day without the contribution of all stakeholders in particular NPs, HFA FPs institutions, UNDP, etc...
