

You are cordially invited to attend a briefing organized by the Permanent Mission of Japan, UNEP, IUCN and the Ramsar Convention:

BRIEFING ON ECOSYSTEM-BASED DISASTER RISK REDUCTION IN THE POST-2015 GLOBAL FRAMEWORK ON DISASTER RISK REDUCTION

-  **SAVE THE DATE**
30 OCTOBER 2014
11:00-13:00
-  **MODERATOR**
Connie Martinez (IUCN)
-  **WELCOME REMARKS**
Dr Muralee Thummarukudy (Post-Conflict and Disaster Management Branch, UNEP)
-  **VENUE**
International
Environmental House II
Chemin de Balexert 7
1219 Châtelaine
Geneva, Switzerland
-  **SPEAKERS**
Radhika Murti (IUCN)
Masato Ohkawa
(Permanent Mission of Japan)
Arnel G. Talisayon
(Permanent Mission of the Philippines)
Tatiana Fedotova (The World Business Council for Sustainable Development)
-  Light refreshments will be served,
hosted by the Permanent Mission of Japan

BACKGROUND

The Hyogo Framework for Action (HFA) is the global blueprint for informing DRR actions from 2005 to 2015. It aims to reduce the loss of lives as well as loss in social, economic and environmental assets of communities across the world. The negotiations for a post-2015 global framework on disaster risk reduction (HFA2) provide an opportunity to strengthen recognition of the critical role ecosystems play in reducing disaster risk and building resilience of communities. This briefing will share experiences from around the world where ecosystem-based solutions are applied to reduce disaster risk and will facilitate discussion on how ecosystem-based DRR could be incorporated in HFA2.
