

Learning Labs @ GP 2019

Sendai Framework Monitoring (Global Indicators: Thematic)

1. Purpose & Objectives:

The session is aiming at deeper understanding of global indicators including data collection and methodologies reported through the online Sendai Framework Monitoring system (SFM). Reporting experiences will be presented by participants on specific Global Indicators (TBD) and followed by lively discussion, which will promote Sendai Framework Monitoring.

2. Target participants:

Current and prospective users of SFM such as national government officials and staff in regional organizations.

(Priority will be given to National Sendai Framework Focal Points)

3. Methodology and Content:

- Progress and challenges on *specific* Global Indicators (TBD: e.g. loss and damage in critical infrastructure,) (facilitated by UNISDR and presented by participants: 30 minutes)
- Discussion on application (e.g. monitor DRR strategies; to enhance risk assessment) (facilitated by UNISDR: 25 minutes)
- Wrap-up

4. Logistics and Resources:

Participants are required to bring their own laptop.
