Kobe, Japan, 26 January 2016

The Philippine Experience in Rehabilitation and Recovery

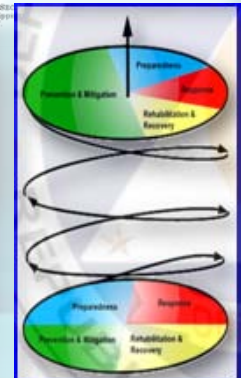

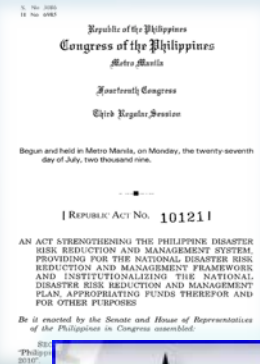

DIR. ROMEO F. FAJARDO
Deputy Administrator
Office of Civil Defense (OCD)
Philippines

Scope of Presentation

- Philippine Disaster Risk Reduction and Management System
- Rehabilitation and Recovery
 - Thematic areas
 - Post Disaster Needs Assessment (PDNA)
 - Rehabilitation Agencies
 - OPARR to NEDA
 - Public-Private Partnership
- TY Yolanda (HAIYAN) Rehab & Recovery
 - Foreign Aid
 - Status of Implementation

PHILIPPINE DISASTER RISK REDUCTION AND MANAGEMENT SYSTEM

- **RA 10121** – Philippine Disaster Risk Reduction and Management Act of 2010
- **National DRRM Framework** – end goal: safer, adaptive and disaster-resilient communities towards sustainable development
- **National DRRM Plan 2011-2028** – outlines programs, projects and activities covering the four thematic areas to strengthen capacity

Four Thematic Areas

NATIONAL DISASTER RISK REDUCTION AND MANAGEMENT COUNCIL
National Disaster Risk Reduction and Management Center, Camp Aguinaldo, Quezon City, Philippines

Post Disaster Needs Assessment (PDNA)

Background

- Initially developed by the United Nations Economic Commission for Latin America and the Caribbean (UNECLAC)
- Modified and enhanced by the World Bank in cooperation and consultation with other development partners
- Used extensively for the last 5 years internationally (Bangladesh, Indonesia, Philippines, among others)

- Multi-sectoral and multi-disciplinary structured approach for **ASSESSING DISASTER IMPACTS** and **PRIORITIZED RECOVERY** and **RECONSTRUCTION NEEDS**
- Undertaken by the government agencies also in collaboration with international development partners and the private sector

Methodologies

The PDNA REPORT is a result of the following methodologies:

- Sectoral experts using prescribed tables
- Series of field visits and site inspections
- Focus Group Discussions (FGD)
- Quantitative analyses (objective)
- Qualitative analyses (subjective)
- Series of writeshops

NATIONAL DISASTER RISK REDUCTION AND MANAGEMENT COUNCIL
National Disaster Risk Reduction and Management Center, Camp Aguinaldo, Quezon City, Philippines

Post Disaster Needs Assessment (PDNA)

INTENDED TO ESTIMATE TWO (2) IMPORTANT FACTORS:

- The short-term interventions to initiate recovery from the damages and losses
- The financial requirements needed to achieve a holistic post-disaster recovery, reconstruction and risk management

PDNA Team Composition

- PDNA teams are generally composed of **professionals** and **technical experts** from different agencies
- Composition depends on the type, scale and severity of the disaster and the sectors involved

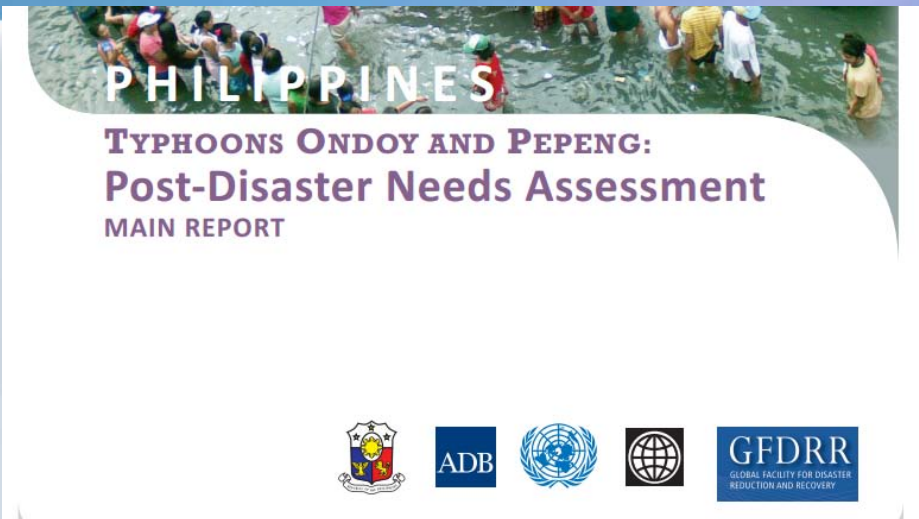

Why PDNA should not be delayed?

- There is an urgent need to seek support from the international community
- The government must already have an overview of the funding and resources required for recovery and reconstruction
