# Understanding and Reducing Landslide Disaster Risk

Volume 5 Catastrophic Landslides  
and Frontiers of Landslide Science

---

## Contents

### Part I Catastrophic Landslides with Different Triggers

|  |     |
|--|-----|
| <b>Rock Avalanches: Basic Characteristics and Classification Criteria</b> .....  | 3   |
| Alexander Strom  |     |
| <b>Study on the Phenomena of Liquefaction Induced Massive Landslides in 28 September 2018 Palu-Donggala Earthquake</b> .....                 | 25  |
| Paulus P. Rahardjo   |     |
| <b>The Krasnogorsk Landslide (Northern Caucasus): Its Evolution and Modern Activity</b> .....  | 49  |
| Igor K. Fomenko, Oleg V. Zerkal, Alexander Strom, Daria Shubina, and Ludmila Musaeva   |     |
| <b>Earthquake-Triggered Landslides and Slope-Seismic Waves Interaction Inferring Induced Displacements</b> .....                             | 57  |
| Salvatore Martino, Celine Bourdeau, José Delgado, and Luca Lenti   |     |
| <b>Slope Deformation caused Jure Landslide 2014 Along Sun Koshi in Lesser Nepal Himalaya and Effect of Gorkha Earthquake 2015</b> .....      | 65  |
| H. Yagi, G. Sato, H. P. Sato, D. Higaki, V. Dangol, and S. C. Amatya   |     |
| <b>Inventory of Landslides Triggered by the Hejing Ms6.6 Earthquake, China, on 30 June 2012</b> .....  | 73  |
| Chong Xu and Kai Li  |     |
| <b>Pressure Head Dynamics on a Natural Slope in Eastern Iburi Struck by the 2018 Hokkaido Earthquake</b> .....                               | 81  |
| Toshiya Aoki, Shin'ya Katsura, Takahiko Yoshino, Takashi Koi, Yasutaka Tanaka, and Takashi Yamada  |     |
| <b>Investigation of 20 August 2019 Catastrophic Debris Flows Triggered by Extreme Rainstorms Near Epicentre of Wenchuan Earthquake</b> ..... | 87  |
| Dalei Peng, Limin Zhang, Hofai Wong, Ruilin Fan, and Shuai Zhang   |     |
| <b>Spatial Distribution of Lakes in the Central Andes (31°–36°), Argentina: Implications for Outburst Flood Hazard</b> .....                 | 95  |
| Mariana Correas-Gonzalez, Stella Maris Moreiras, and Jan Klimeš  |     |
| <b>Rockfall/Rockslide Hazard, Lake Expansion and Dead-Ice Melting Assessment: Lake Imja, Nepal</b> .....                                     | 103 |
| Tomas Kroczech and Vit Vilimek   |     |
| <b>Formation of the 2018 Bureya Landslide, Far East of Russia</b> .....  | 111 |
| Oleg V. Zerkal, Aleksey N. Makhinov, Alexander Strom, Vladimir I. Kim, Michael E. Kharitonov, and Igor K. Fomenko                            |     |

|   |     |
|---|-----|
| <b>Landslide Dam Hazards: Assessing Their Formation, Failure Modes, Longevity and Downstream Impacts . . . . .</b>  | 117 |
| Regine Morgenstern, Chris Massey, Brenda Rosser, and Garth Archibald  |     |
| <b>The Sedimentology and Internal Structure of Landslide Dams—Implications for Internal Erosion and Piping Failure: A Review . . . . .</b>  | 125 |
| Chukwueloka A. U. Okeke   |     |
| <b>An Interdisciplinary Assessment of a Coal-Mining-Induced Catastrophic Landslide (Czech Republic) . . . . .</b>   | 133 |
| Jan Burda and Vít Vilímek   |     |
| <b>Could Glacial Retreat-Related Landslides Trigger Volcanic Eruptions? Insights from Mount Meager, British Columbia . . . . .</b>  | 147 |
| Gioachino Roberti, Brent Ward, Benjamin van Wyk de Vries, Nicolas Le Corvec, Swetha Venugopal, Glyn Williams-Jones, John J. Clague, Pierre Frielle, Giacomo Falorni, Geidy Baldeon, Luigi Perotti, Marco Giardino, and Brian Menounos |     |
| <b>Rock Avalanches in the Upper Reaches of the Mzymta River, Russia . . . . .</b>   | 153 |
| Andrey A. Ponomarev, Kai Kang, and Oleg V. Zerkal   |     |
| <b>Structural and Dynamic Numerical Models of Rockslides in the Carpathians and the Alps . . . . .</b>  | 159 |
| Emilie Lemaire, Anne-Sophie Mreyen, and Hans-Balder Havenith  |     |
| <b>Quantitative Investigation of a Mass Rock Creep Deforming Slope Through A-Din SAR and Geomorphometry . . . . .</b>   | 165 |
| Michele Delchiaro, Emanuele Mele, Marta Della Seta, Salvatore Martino, Paolo Mazzanti, and Carlo Esposito   |     |
| <b>Deformational Features of Deep-Seated Gravitational Slope Deformation of Slate Slopes in the Central Range, Taiwan . . . . .</b>   | 171 |
| Ching-Ying Tsou, Masahiro Chigira, Yu-Chung Hsieh, Mien-Ming Chen, and Tai-Chieh He   |     |
| <b>Bathymetric Analyses of Submarine Landslides on the Jan Mayen Ridge, Norwegian–Greenland Sea . . . . .</b>   | 177 |
| Kiichiro Kawamura and Jan Sverre Laberg   |     |
| <b>Forkastningsfjellet Rock Slide, Spitsbergen: State of Activity in a Changing Climate . . . . .</b>   | 183 |
| Dirk Kuhn, Reginald L. Hermanns, Jewgenij Torizin, Michael Fuchs, Tim Redfield, Raymond Eilertsen, and Dirk Balzer  |     |
| <b>Catastrophic Landslides in Indian Sector of Himalaya . . . . .</b>   | 191 |
| Vinod K. Sharma   |     |
| <b>Part II Frontiers of Landslide Science</b>   |     |
| <b>Enhancing Preparedness Against Impact of Climate Change on Slope Safety in Hong Kong . . . . .</b>   | 201 |
| K. K. S. Ho, H. W. Sun, E. J. Lam, and F. L. C. Lo  |     |

---

|   |     |
|---|-----|
| <b>Climate Change and Surface Deformation Characteristics in Degradation Area of Permafrost in Lesser Khingan Mountain, China . . . . .</b>                         | 209 |
| Wei Shan, Chengcheng Zhang, Ying Guo, Monan Shan, Xujing Zeng,<br>and Chunjiao Wang   |     |
| <b>Climate Change Impact Evaluation on the Water Balance of the Koroška<br/>Bela Area, NW Slovenia . . . . .</b>  | 221 |
| Nejc Bezak, Tina Peternel, Anže Medved, and Matjaž Mikoš  |     |
| <b>Global Warming as a Predisposing Factor for Landslides in Glacial and<br/>Periglacial Areas: An Example from Western Alps (Aosta Valley, Italy) . . . . .</b>    | 229 |
| Jessica Maria Chicco, Marco Frasca, Giuseppe Mandrone, Damiano Vacha,<br>and Laurie Jayne Kurilla   |     |
| <b>Characteristics and Causes of the Debris Flow in Shelong Gully, China . . . . .</b>  | 237 |
| Qiang Zou, Peng Cui, Hu Jiang, Yanguo Liu, Cong Li, Sheng Hu, and Bin Zhou  |     |
| <b>MPM Modelling of Buildings Impacted by Landslides . . . . .</b>  | 245 |
| Sabatino Cuomo, Angela Di Perna, and Mario Martinelli   |     |
| <b>Accelerating Landslide Hazard at Kandersteg, Swiss Alps; Combining 28 Years<br/>of Satellite InSAR and Single Campaign Terrestrial Radar Data . . . . .</b>      | 267 |
| Rafael Caduff, Tazio Strozzi, Nils Hählen, and Jörg Häberle   |     |
| <b>Identification Old Landslides in Permafrost Degradation Area in Northeast<br/>China by Difference Distribution of Surface Trees . . . . .</b>                    | 275 |
| Ying Guo, Wei Shan, Zhichao Xu, Chunjiao Wang, and Shuanglin Wang   |     |
| <b>Forensic Geotechnical Investigation of the Skjeggestad Quick Clay Landslide,<br/>Norway . . . . .</b>  | 283 |
| Thi Minh Hue Le, Vidar Gjelsvik, Suzanne Lacasse, Stein-Are Strand, Eirik Traae,<br>and Vikas Thakur  |     |
| <b>Accuracy Assessment of Unmanned Aerial Vehicle (UAV) Structure<br/>from Motion Photogrammetry Compared with Total Station<br/>for a Deformed Slope . . . . .</b> | 291 |
| Vera Hui Loo and Chou Khong Wong  |     |
| <b>ARAS: A Web-Based Landslide Susceptibility and Hazard Mapping System . . . . .</b>   | 301 |
| Murat Ercanoglu, Mehmet Balçılars, Fatih Aydin, Sedat Aydemir, Güler Deveci,<br>and Bilgekağan Çintimur   |     |
| <b>A Landform Evolution Model for the Mannen Area in Romsdal Valley,<br/>Norway . . . . .</b>   | 309 |
| Paula Hilger, Reginald L. Hermanns, and Bernd Etzelmüller   |     |
| <b>Multimethodological Study of Non-linear Strain Effects Induced by Thermal<br/>Stresses on Jointed Rock Masses . . . . .</b>                                      | 315 |
| Guglielmo Grechi and Salvatore Martino  |     |
| <b>Extreme Rainfall Induced Landslide Susceptibility Assessment Using<br/>Autoencoder Combined with Random Forest . . . . .</b>                                     | 323 |
| Kounghoon Nam and Fawu Wang   |     |
| <b>Economizing Soil Nailing Design by Drainage Improvement—Case History<br/>at Ginigathhena . . . . .</b>   | 331 |
| S. O. A. D. Mihira Lakruwan and S. A. S. Kulathilaka  |     |

|   |     |
